

YOUR GATEWAY TO DIGITAL TRANSFORMATION

DocFactory is a one-stop-shop solution for complete digitization. Count on us to help you go paperless: efficient and reliable document scanning, mass digitization, data extraction, smart capture, digital signature, automated conversion, integration into applications, long-term archiving, etc.

SIMPLE, COMPREHENSIVE SCANNING

DocFactory is a universal digitization server providing seamless connection from your scanning devices to one central platform regardless of geographic location.

Enjoy these advanced features:

- Automatically identify or separate documents in batches, structure multiple-level scanning folders and easily route them to the right department
- Data extraction and structuring thanks to optical character recognition (OCR) for full-text reading on PDFs, barcodes, and QR codes for smooth integration into business processes
- Hyper compression allowing for OCR'd color PDF/A files the size of plain B&W
- Automated document correction and enhancement tools
- Standard and normalized format (PDF/A) for long-term archiving
- Easy to use

originals while set in optimal formats for retention and distribution:

- Office documents (Microsoft Office, Open Office) conversion
- Server-side automated PDF conversion (digital signature ready, for archiving and/or expedition).

RELIABLE DIGITAL SIGNATURE

DocFactory features a PAdES (PDF Advanced Electronic Signature) for automatic digital signature and time stamp, letting you:

- Guarantee origin, integrity and authenticity for every document regardless of their lifetime
- Enjoy an efficient e-invoicing service with outgoing signed versions

SMOOTH INTEGRATION

DocFactory offers numerous connections and integrations for easy exploitation of extracted information from scanning and capture processes:

- Off-the-shelf / standard connectors with Microsoft SharePoint, Alfresco, Elise, etc.
- Generic connectors (filesystem, web-services) to integrate into line-of-business applications
- Comprehensive SDK for developers

HIGH PERFORMANCE TO SCALE

Document transformation is a critical part of your business processes so DocFactory offers a high performance, reliable platform that's able to adapt to document traffic growth with:

- Multiple and simultaneous document processing chains
- Embedded monitoring tools
- Large-scale industrial quality tools for optimizing data capture

SMART CAPTURE OF ELECTRONIC DOCUMENTS

DocFactory connects to your business applications to automatically integrate structured and semi-structured information from electronic documents:

- Customizable selection of relevant information for surgical/precise metadata extraction
- Automatic recognition to identify individual electronic documents within a batch and sort them according to their types and destination

CONVERT DOCUMENTS QUICKLY

Take advantage of automated DocFactory PDF conversion into your applications and corporate processes. All PDF documents generated by DocFactory look just like their

You want to go digital?
